**BETTER MACHINES.
TO HELP YOU SUCCEED.**

PRECISION IN:SHAPE

We go the extra mile – for you. Your vision is our top priority. The right machine can make all the difference. Between you and the competition. It should be tailored to your needs. So you can face your challenges with maximum confidence and security in the age of Industry 4.0.

We believe the key to better results is flexibility. We'll design your machine using modules that are proven, tried and tested. That means top quality, delivered fast.

Whether it's presses, conveyor systems, transfer systems or peripheral system components such as tool changers or robots – with Helmerding, you're ready to face the future.

04 Stamping and forming machines

05 Coil feeding systems

06 Transfer systems

07 Single-column presses

08 Special machines

11 Our promise to you

PUNCHING AND FORMING MACHINES

**630 TO
2.000 kN**

**CONVENTIONAL
OR SERVODRIVE**

Our presses are the all-rounders of metalworking. We are technological leaders in the field, and we're familiar with the high standards of your industry. With years of experience, we give automotive suppliers and companies in the appliance, energy and electronics sectors the production reliability they need.

You can count on the efficient, high-performance interplay between press and peripherals.

COIL FEEDING SYSTEMS

**200 TO
2,000 MM**

**TO 25 TONS
COIL WEIGHTS**

**CROSS-SECTIONS
UP TO 6,000 MM²**

Uncoilers:

- Single-head
- Double-head

Straightening machines:

- 7-21 straightening rollers
- Strip thickness 0.3-10 mm

Roll feeding systems:

- Single-roll feeders
- Zigzag roll feeders

We'll find the right coil feeding solution – perfectly tailored to your needs. Just like our uncoiling equipment, our straightening machines and feeders, our company helps your entire production facility run more efficiently. With our certified business processes and a high in-house production share, you can expect uncompromising precision and quality.

SINGLE-COLUMN PRESSES

**250 TO
4,000 kN**

Our single-column presses are tailored to your process flows – from trimming presses to cleanroom presses. With our wide-ranging expertise, we're equipped to provide you with superior machines for flawless production.

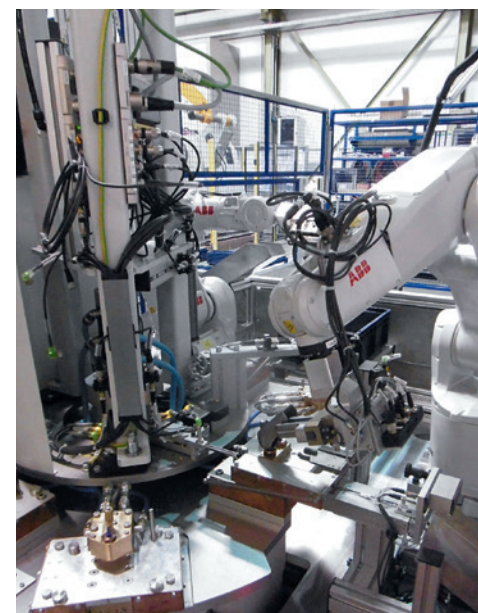

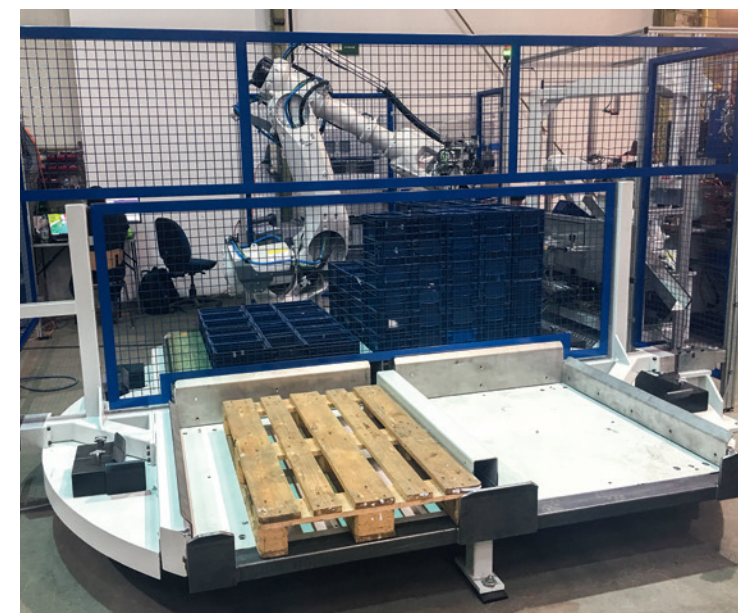

TRANSFER SYSTEMS

TRANSFER- OR FEEDER SYSTEMS

Our transfer equipment is designed to fit your preferences and specifications. Using modular functional units, we create custom-built systems for any application. Parts are transported through the press using vertically mounted or suspended transfer units, space-saving gripper and lever units, suction cup bridges, active grippers, as well as magnetic and suction tools. That way, Helmerding guarantees optimised and secure part transport through your compound or stand-alone presses.

SPECIAL MACHINES

Already know what machine you need? Or just starting to sketch out your specifications? Whatever your idea looks like – we'll make it happen. As an experienced builder of special-purpose machines, we're a partner you can trust.

We can also provide you with tailored solutions for assembly, welding, gluing or transport and positioning. We base our designs on your performance specifications, because every automation process requires specific functions. Choosing the right design concept is a decisive factor in the automation of special-purpose machines. If you're serious about effective, reliable and sustainable automation for your production operations, then take advantage of our specialised experience and vast store of automation know-how.

We work with you to develop the perfect system with whatever the level of automation you need – whether it's an adaptable assembly fixture or a fully-automated production system.

OUR PROMISE TO YOU

Your individual needs are what drives us to provide excellent products and services. That's why you can count on us in everything we do. That means fast delivery times, flexibility, development support, process reliability, 24-hour customer service and dependable spare parts and maintenance service, as well as products that meet your requirements for top-quality results.

At our cutting-edge facility, we're well-equipped for manufacturing technologically advanced equipment. Our machinery and our team are ready to create the solution you're looking for. That's how we provide you with maximum reliability. Because, as engineering experts, we understand – you make your living with the solutions we build. And we take this responsibility seriously.
